

Know the Costs®

MAKING THE MOST OF YOUR RADIOLOGY BENEFIT

Know the Costs® (KTC) is a radiology benefit provided by your employer that allows you to have most radiology exams at no cost to you!

How to Use Your Benefit

When you use *Know the Costs*® you'll pay **\$0** vs. co-pays, deductibles and co-insurance under your insurance plan.

Important! Notify your MD that you want to use your *Know the Costs*® benefit **before** they make an imaging appointment.

Contact *Know the Costs*® to facilitate your exam with one of our nationwide accredited sites.

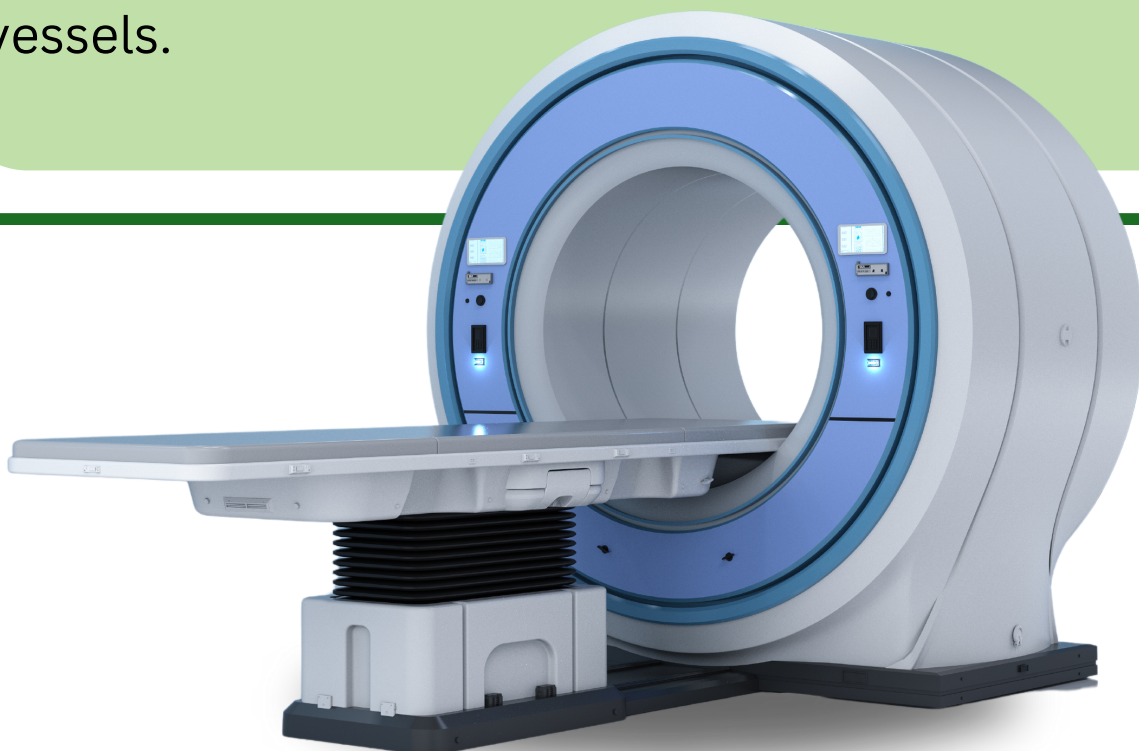

Modality Spotlight

Computed Tomography

A computed tomography (CT) exam, also known as a CT scan or CAT scan, is a medical procedure that combines x-ray technology with advanced computer processing to create cross-sectional images of the body.

During the exam, the patient lies on a table that moves through a doughnut-shaped machine. Sometimes to help certain anatomy show up better you will be asked to drink an oral contrast or you may be given an injection.

Your doctor will decide if these are needed for your test. CT scans are a valuable tool in helping diagnosis and provide clear images of soft tissues, bones, and blood vessels.
