

National Drug List

Drug list – Three (3) Tier Drug Plan

Blue Cross Blue Shield of Georgia prescription drug benefits include medications on the Anthem National Drug List. You can save money when your doctor prescribes medications on the drug list. This list is not comprehensive. And your coverage has limitations and exclusions. For example, drugs used for cosmetic purposes usually are not covered. Always refer to your Certificate or Evidence of Coverage for details about what's covered and what's not. Then if you have additional questions, call Customer Service at the number on your member ID card.

Blue Cross Blue Shield of Georgia Drug List

Your prescription drug benefit includes coverage for medications that you'll find on the Anthem National Drug List. You may save money by using lower tier drugs.

Q. What is a Drug List?

A. The Anthem National Drug List, also called a formulary, has drugs on it that are approved by the U.S. Food and Drug Administration (FDA). This includes brand-name and generic drugs, reviewed and recommended for their quality and for how well they work. The review is done by the National Pharmacy and Therapeutics (P&T) Process. The P&T process involves an independent group of practicing doctors and pharmacists in charge of the research and decisions surrounding our drug list. This group meets regularly to review new and existing drugs. They choose the top drugs for our list – based on their safety, how they work and their value. Drugs on our list are reviewed from time to time. Sometimes this results in drugs being added or removed. So now and then, it's a good idea to check the status of any drugs you may be taking. You can see the list by going to bcbsga.com. Also, we will always try to notify you of any changes to the formulary that impact you.

Q. How do we determine the tier of a drug?

A. Medications on the Anthem National Drug List are grouped into tiers. Drugs on the lowest tier have the lowest cost share, which is what you pay. Drugs on the highest tier cost you more. Several factors determine what tier a drug is placed in, including:

- Cost of the drug
- Cost of the drug compared to other drugs used for the same treatment
- Availability of over-the-counter options

Tier Definitions

Tier 1 drugs have the lowest cost share. These drugs offer the greatest value compared to others that treat the same conditions.

Tier 2 drugs have a medium cost share. They may be preferred drugs, based on their effectiveness and value. Some are newer, more expensive generic drugs. Tier 2 drugs have a higher cost share than Tier 1.

Tier 3 drugs have a higher cost share. They may cost more than others used to treat the same condition. Tier 3 may also include drugs that were recently approved by the FDA. Tier 3 drugs have a higher cost share than Tier 2.

Q. What are “clinically equivalent” medications? How does this affect my drug coverage?

A. When drugs are compared in studies, some drugs are found to be just as effective as others. When one drug works just as well as another for the same purpose, they are said to be “clinically equivalent.” Part of the P&T process is to review the most current studies to see if multiple drugs used to treat a disease or a condition have the same effect on a patient. When this is the case, the review team may suggest that we cover only the lower-cost drug. (This helps keep the overall cost of health care as low as possible). This is also why your specific prescription drug plan may not cover some drugs (indicated by a ^ symbol next to the drug name) that have “clinically equivalent” options.

Q. Is this list a complete listing of all covered drugs under the National Drug List?

A. No. This document lists the most commonly used drugs that are covered as part of the National Drug List. If the drug you are looking for is not listed, you may call Customer Service for more information. The number is on your member ID card.

For more information about your drug plan, you can do the following:

- **Go to bcbsga.com**
- **Call Customer Service at the number on your ID card**
- **Speech and hearing impaired users (TDD/TTY) should call 800-221-6915, Monday – Friday, 8:30 a.m. – 5:00 p.m., ET**

Tier 1 drugs have the lowest cost share. These drugs offer the greatest value compared to others that treat the same conditions.

Tier 2 drugs have a medium cost share. They may be preferred drugs, based on their effectiveness and value. Some are newer, more expensive generic drugs. Tier 2 drugs have a higher cost share than Tier 1.

Tier 3 drugs have a higher cost share. They may cost more than others used to treat the same condition. Tier 3 may also include drugs that were recently approved by the FDA. Tier 3 drugs have a higher cost share than Tier 2.

Tier 1

Abacavir
 Abacavir/lamivudine/zidovudine
 Acamprosate
 Acarbose
 Acebutolol
 Acetaminophen/caffeine/butalbital, **QL**
 Acetaminophen/caffeine/butalbital/codeine, **QL**

KEY

This † symbol means:

A generic equivalent of this drug recently became available or will be available soon. After the generic drug becomes available and notification requirements are met, this brand-name drug will become Tier 3 or may no longer be covered by your prescription drug plan. Check bcbsga.com to find out about changes in tier status.

This ^ symbol means:

This product has clinically equivalent alternatives included on the drug list. As a result, this product may not be covered under your pharmacy benefit. For coverage details, consult your online pharmacy account through your health care plan website at bcbsga.com

This ~ symbol means:

You must try this drug first when treating some conditions.

This # symbol means:

Tier 3 for Indiana.

PA = PRIOR AUTHORIZATION REQUIRED. Prior authorization means certain prescriptions have to be approved for coverage first, before they can be filled.

QL = QUANTITY LIMITS. Certain prescription drugs have quantity limits, meaning you can get only a specific amount of the drug at a time, per prescription or per month. This is usually for safety reasons.

ST = STEP THERAPY REQUIRED. You will need to use one medication first, before the use of another medication can be authorized.

ST ∞ = STEP THERAPY MAY BE REQUIRED. You may need to use one medication first, before the use of another medication can be authorized.

DO = DOSE OPTIMIZATION REQUIRED. This typically involves converting from a twice-daily dosing to a once-a-day dosing schedule.

Not all medications and not all plans are subject to prior authorization and quantity limits. For more information regarding prior authorization or quantity limits, contact Customer Service at the telephone number listed on your identification card.

**For more information,
please visit bcbsga.com.**

- **If you have additional questions about your prescription benefits please call the Customer Service number on your ID card**
- **Speech and hearing impaired (TDD/TTY users) should call 800-221-6915, Monday – Friday, 8:30 a.m. – 5:00 p.m., ET**
- **For the most current version of this prescription drug list, please visit bcbsga.com**
